Setup is quick and easy ... Just Go!

The following settings have been pre-set to accommodate typical patient treatment values:

**S8 Elite II**

- **Start CPAP:**
  - CPAP: 4 cm H₂O
  - Ramp: 9 cm H₂O
  - Max Ramp: 20 minutes
  - Humid: 45 minutes
  - SmartStart: None
  - Reminders: Off
  - Mask: Off
  - Leak Alert: Ultra

- **Settings:**
  - Tube Length: 2 m
  - Language: English
  - Smart Data: Off
  - Auto Appear: Off
  - Patient Menu: Std
  - EPR: Off
  - EPR Level: Off
  - EPR Inhale: Med
  - EPR Access: Off

**Important:** Remove this guide before handing the device to the patient. Pressures should only be adjusted by qualified personnel.
Accessing the clinical menu

- Turn on the device and wait until the standby (RAMP) screen appears on the LCD. At this stage you can adjust the ramp time.

- Press [ ] and [ ] simultaneously for three seconds to access the clinical menu.

Accessing the quickview menu

- Press [ ] and [ ] simultaneously for three seconds to access the clinical menu.

Changing options and settings

- Press [ ] to access standard machine settings, eg, Start CPAP pressure.

- Use [ ] and [ ] to scroll through the RESULTS, OPTIONS and SERVICING menu screens.

- From a menu screen, use [ ] to access the parameters in that menu.

- Use [ ] and [ ] to scroll through menu parameters.

- Use [ ] to view or change each parameter setting as required.

- Press [ ] until you return to the standby (RAMP) screen.

See the Clinical Guide for full details.

Note: For each reminder, you can set a time period for that reminder to keep re-occurring. For these recurring reminders to work, you must set the date for the first occurrence of the reminder as well as a recurrence time period.

For example, if you set MASK: 30 Jun 2008 and MASK RECUR: 6mth, the first reminder to replace the mask is displayed on 30 June 2008. The recurring reminder occurs 6 months from the date the reminder is acknowledged by the patient. The reminder will continue to recur at 6-month intervals unless it is set to OFF or the recurrence period is changed.
